Ooh Matron!

Sarah Jane has no career aspirations, all she wants is to leave school, work as a cashier at Woolworths and get married. Then everything changes and she finds herself wearing a fluorescent pink uniform and studying to get into Nursing School. What inspired this surprising change of direction? What happens when she leaves home to live in a garrison town with a housemate who is a party animal? The big question being, is she really cut out to be a nurse? Let's start at the beginning with Sarah Jane as a sixteen-year-old country girl, a bit old fashioned but who has a mischievous sense of humour and who suddenly decides she wants to be a nurse! "This funny, yet poignant nursing memoir has Sarah Jane's trademark honest writing style which shines through in every story she tells. From starting her student nurse training in Essex to coping with patients in happy, sad and heart-breaking situations. It gives you a young woman's view into the realities of entering the world of nursing in the 1980's. A highly entertaining and informative memoir which was able to take me from laughing out loud to having welled tears of empathy." S. Brewster

Bullshit Jobs

From bestselling writer David Graeber—"a master of opening up thought and stimulating debate" (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled "On the Phenomenon of Bullshit Jobs." It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society's most vexing and deeply felt concerns, indicting among other villains a

particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. “Clever and charismatic” (The New Yorker), *Bullshit Jobs* gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and “a thought-provoking examination of our working lives” (Financial Times).

The Mammaries of the Welfare State

In this sequel to Upamanyu Chatterjee's debut novel, *English, August*, Agastya Sen— older, funnier, more beleaguered, almost endearing— and some of his friends are back. Comic and Kafkaesque, *The Mammaries of the Welfare State* is a masterwork of satire by a major writer at the height of his powers.

Labor in Nigeria

Carol Bissett started nursing at 17 in the late 1960's, finally retiring in 2014. During those years she had some breaks, emergency stops and did a few three-point turns. This window into her world shows the way, we have over the years, treated both nurses and patients. How we view sickness and death, and the ways in which we deal with both. Sad in parts but written with Carol's irreverent sense of humour, which brings the saying 'life goes on' very much to mind.

Tackling the job with skills picked up along the way and enough Redbull to sink a battleship. The stories are real. The patients are real, and the emotions are real. Glass Half Full

From the author of the international bestseller *Debt: The First 5,000 Years* comes a revelatory account of the way bureaucracy rules our lives Where does the desire for endless rules, regulations, and bureaucracy come from? How did we come to spend so much of our time filling out forms? And is it really a cipher for state violence? To answer these questions, the anthropologist David Graeber—one of our most important and provocative thinkers—traces the peculiar and unexpected ways we relate to bureaucracy today, and reveals how it shapes our lives in ways we may not even notice...though he also suggests that there may be something perversely appealing—even romantic—about bureaucracy. Leaping from the ascendance of right-wing economics to the hidden meanings behind Sherlock Holmes and Batman, *The Utopia of Rules* is at once a powerful work of social theory in the tradition of Foucault and Marx, and an entertaining reckoning with popular culture that calls to mind Slavoj Žižek at his most accessible. An essential book for our times, *The Utopia of Rules* is sure to start a million conversations about the institutions that rule over us—and the better, freer world we should, perhaps, begin to imagine for ourselves.

Just a Few Bumps

Karl Marx remarked that the only way to write about the origins of capitalism is in the letters of blood and fire used to drive workers from the common lands, forests, and waters in the sixteenth century. In this collection of essays, George Caffentzis argues that the same is true for the annals of twenty-first-century capitalism. Information technology, immaterial production, financialization, and globalization have been trumpeted as inaugurating a new phase of capitalism that puts it beyond its violent origins. Instead of being a period of major social and economic novelty, however, the course of recent decades has been a return to the fire and blood of struggles at the advent of capitalism. Emphasizing class struggles that have proliferated

across the social body of global capitalism, Caffentzis shows how a wide range of conflicts and antagonisms in the labor-capital relation express themselves within and against the work process. These struggles are so central to the dynamic of the system that even the most sophisticated machines cannot liberate capitalism from class struggle and the need for labor. Themes of war and crisis permeate the text and are given singular emphasis, documenting the peculiar way in which capital perpetuates violence and proliferates misery on a world scale. This collection draws upon a careful rereading of Marx's thought in order to elucidate political concerns of the day. Originally written to contribute to the debates of the anticapitalist movement over the last thirty years, this book makes Caffentzis's writings readily available as tools for the struggle in this period of transition to a common future.

This book is an in-depth analysis of three of the most crucial years in twentieth-century Italian history, the years 1943-46. Drawing on texts from the literature, film, journalism, and political debate of the period, Antifascisms offers a thorough survey of the personalities and positions that informed the decisions taken in this crucial phase of modern Italian history.

A fascinating portrayal of life in an Indian middle-class family by the best-selling author of English, August Upamanyu Chatterjee's second novel brilliantly recreates life in an average Indian family at the end of the twentieth century. Jamun, the central character, is a young man, unmarried, adrift. He stays away from his family, which comprises his parents, Urmila and Shyamanand, his elder brother, Burfi, his sister-in-law, Joyce, his two nephews and the children's ayah. Jamun returns to the family when his mother is hospitalized. Once there, he decides to stay on until one of his ailing parent dies. He barely admits to himself that there is another, probably stronger, reason for his extended stay in the family home— an old friend Kasturi, now married and pregnant, who has returned to the city (that she associates with Jamun) . . . Flitting back and forth in time and space, and writing in a language of unsurpassed richness and power, Upamanyu Chatterjee presents a funny, bitterly accurate and vivid portrait of the awesome burden of family ties.

Somewhere between global and local, the nation still lingers as a concept. National art histories continue to be written – some for the first time – while innovative methods and practices redraw the boundaries of these imagined communities. Narratives Unfolding considers the mobility of ideas, transnationalism, and entangled histories in essays that define new ways to see national art in ever-changing nations. Examining works that were designed to reclaim or rethink issues of territory and dispossession, home and exile, contributors to this volume demonstrate that the writing of national art histories is a vital project for intergenerational exchange of knowledge and its visual formations. Essays showcase revealing moments of modern and contemporary art history in Canada, Egypt, Iceland, India, Ireland, Israel/Palestine, Romania, Scotland, Turkey, and the United Arab Emirates, paying particular attention to the agency of institutions such as archives, art galleries, milestone exhibitions, and artist retreats. Old and emergent art cities, including Cairo, Dubai, New York, and Vancouver, are also examined in light of avant-gardism, cosmopolitanism, and migration. Narratives Unfolding is both a survey of current art historical approaches and their connection to the source: art-making and art experience happening somewhere.
